2020

HERFF JONES  BY YOUR SIDE.

## 'CLIMATE CRISIS'

**A MASSIVE ICEBERG** that was bigger than Los Angeles, broke off the Amery Ice Shelf in Antarctica in October. It was the largest in more than 50 years. Named D-28 by scientists, it was 632 square miles, as tall as a 58-story building and weighed 315 billion tons. Because of its size, it had to be tracked as it could pose a hazard to shipping. **ELEVEN THOUSAND SCIENTISTS** from 153 nations, in a statement published in the journal *Bioscience*, warned that the world's population will face "untold suffering due to climate crisis" unless there are major transformations to global society. The statement read, "We declare clearly and unequivocally that planet Earth is facing a climate emergency. To secure a sustainable future, we must change how we live. [This] entails major transformations in the ways our global society functions and interacts with natural ecosystems." Lead author of the statement, Prof. William Ripple of Oregon State University, said he was driven to initiate it by the increase in extreme weather he was seeing.

**LANDSCAPES THAT WERE ONCE TOO COLD** for some insects to survive had been warming up, allowing many species to expand their ranges. Since the 1970s, insects in the warmer half of Britain had been moving northward at an average rate of around five meters per day.

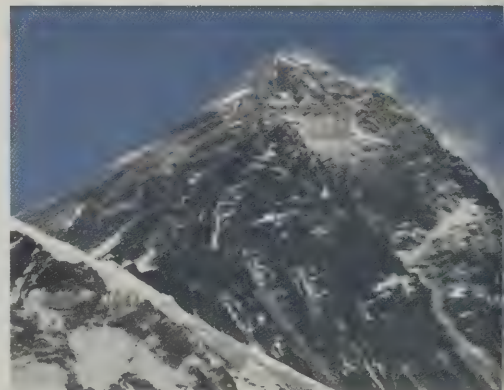

**ASPIRIN CAN HELP YOUR LUNGS** according to a study from Columbia, Harvard and Boston universities. The study provided evidence that nonsteroidal anti-inflammatory drugs (NSAIDs), like aspirin, may lessen the adverse effects of air pollution exposure on lung function.

Researchers found use of any NSAID reduced the effect of particulate matter on lung function by nearly one half. **IN A RARE DISCOVERY**, researchers found five new bird species and five new subspecies in three small island groups off Sulawesi, Indonesia. (Common warbler pictured.)

## EVEREST THAW

**PLANT LIFE EXPANDED** in the area surrounding Mount Everest, according to new research from the University of Exeter, which supported global warming theories. Using data from 1993 to 2018 from NASA's Landsat satellites, researchers measured small but significant increases in subnival vegetation, plants capable of growing underneath snow.

**BUSHFIRES IN AUSTRALIA RAGED** across the New South Wales territory September through January burning an estimated 21 million acres, destroying more than 2,500 buildings and killing 25 people as of Jan. 5. Smoke could be seen from as far away as New Zealand. Experts estimated that more than a billion animals — many unique to Australia — were affected or killed by the fires. Gusty, fickle winds, bone-dry air, dozens of already burning blazes and unusually high temperatures combined to elevate wildfire risks to "catastrophic levels," according to the New South Wales Rural Fire Service and the country's Bureau of Meteorology. The bushfires were regarded by the NSW Rural Fire Service as the worst bushfire season in memory.

### TEEN TRIUMPH

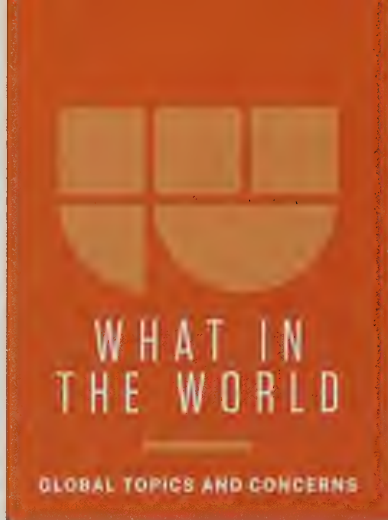

**WITH A NEW METHOD** for removing microplastics from water, Irish 18-year-old Fionn Ferreira won the Google Science Fair and \$50,000. Microplastics are tiny particles often included in soaps, shower gels and scrubs to exfoliate skin. They can also come off of fabric during washing. They make their way through filters and into water where they become concentrated in fish that humans consume. The Google Science Fair launched in 2011 and was open to teens 13–18. It was also sponsored by LEGO, Virgin Galactic, National Geographic and Scientific American.

## DORIAN'S DAMAGE

**A CATEGORY 5 STORM,** Hurricane Dorian hit Grand Bahama Island Sept. 2 then stalled, dumping an estimated three feet of rain and lashing the island with its 185-mile-per-hour winds before finally pulling away from the island on Sept. 3. Damage was estimated at more than \$3.4 billion, and there were at least 61 deaths in the country. Another 282 people were listed as missing.

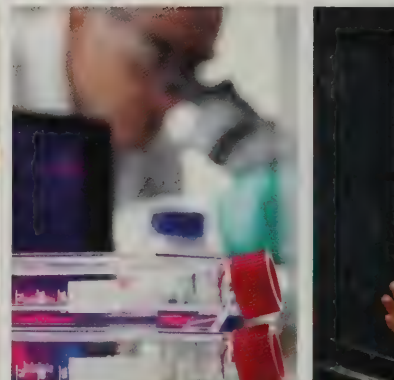

## CHANGE IN ASIA

**MILLIONS OF DEMONSTRATORS** marched in Hong Kong in June 2019. They were protesting the Hong Kong government's proposal to change the extradition law. While the government eventually backed down and announced it would suspend the bill, protests continued amid complaints that the government could reinstate it whenever it wished to do so.

**FOR THE FIRST TIME** in more than two centuries, an emperor of Japan stepped down from the Chrysanthemum Throne. Emperor Akihito abdicated his title in June 2019, which marked the end of the Heisei era and, a day later, his son was pronounced the new emperor, beginning the Reiwa era.

**ONE OF THE FINEST EXAMPLES** of French Gothic architecture, the 850-year-old Notre-Dame Cathedral in Paris, suffered major damage on April 15, 2019, when a fire broke out during renovations. The iconic spire and a large part of its roof were destroyed in the fire. Pledges to support the reconstruction of the landmark topped \$1 billion. **IN ONLY THE SECOND CASE** of its kind, a stem cell transplant made a London patient's HIV "undetectable." Doctors reported that he was in remission for 18 months and stopped taking HIV drugs. Although experts suggest it was too early to say he was completely cured, this marked a step closer to finding a cure. **DRUG LORD JOAQUIN 'EL CHAPO' GUZMAN** was found guilty by a New York jury, in February 2019, on all counts of drug trafficking, money laundering and murder. He was sentenced to life in prison and was taken to ADX Florence, a supermax prison in Colorado, where it was hoped the location would prevent any escape attempts in the future. **AVIATION AUTHORITIES** from around the globe decided to ground the Boeing 737 MAX in March 2019 after two separate accidents killed 346 people. In each accident, the plane experienced repeated nose dives during which the pilots were unable to control the aircraft. Boeing estimated the total costs for the grounding to be \$18.6 billion.

## BRITISH BREAKDOWN

**AFTER PRIME MINISTER** Theresa May resigned over an inability to secure a lasting Brexit deal with the European Union, Boris Johnson was elected Prime Minister with a convincing victory over his competitor, Jeremy Hunt. One of Johnson's promises was to get a Brexit deal done by Oct. 31. While that didn't happen, a vote did occur in December. Officially, Britain left the EU on Jan. 31, 2020.

**SEVENTH IN LINE** for the British throne, Archie Harrison Mountbatten-Windsor was born on May 6 to Prince Harry and Meghan, Duke and Duchess of Sussex. In January, the royal couple announced they intended to "step back" as senior members of the royal family and divide their time between North America and the UK.

## ARMS AMENDMENT

**IN THE WAKE** of the March 15, 2019, mosque shootings in Christchurch, New Zealand, which left 51 people dead and 49 injured, New Zealand Prime Minister Jacinda Ardern announced gun laws would change. On April 10, the Arms Amendment Act of 2019 passed, banning semi-automatic firearms, magazines and parts. A buy-back program was included.

### INTERNATIONAL ISSUE

**A CORONAVIRUS**, which had its beginning in the city of Wuhan, China, spread worldwide. Within a matter of weeks, the virus had overtaken the 2003 SARS epidemic, and on Jan. 30 the World Health Organization had declared the coronavirus a public health emergency of international concern. Nearly 500 were reported dead as of February.

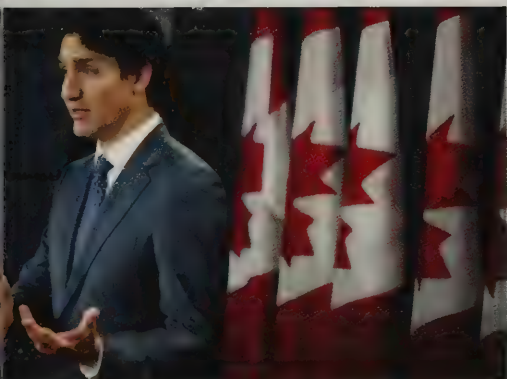

## YOUTHFUL VOICE

### TIME MAGAZINE'S

person of the year, Greta Thunberg, a 17-year-old climate activist, paid a visit to the Americas in August. She traveled to the U.S. on a 60 ft. racing yacht equipped with solar panels and underwater turbines, an example of carbon neutral transportation. While in the U.S., Thunberg spoke at the United Nations and participated in numerous climate protests in more than eight cities across North America.

**CANADA HELD ITS 43RD GENERAL ELECTION** in October and the Liberal Party, led by Justin Trudeau, won 157 seats to form a minority government, losing the majority they had won in the 2015 election. This marks only the second time in Canada's history that the governing party will form a government while receiving less than 35 percent of the national popular vote.

## GAMER GEAR

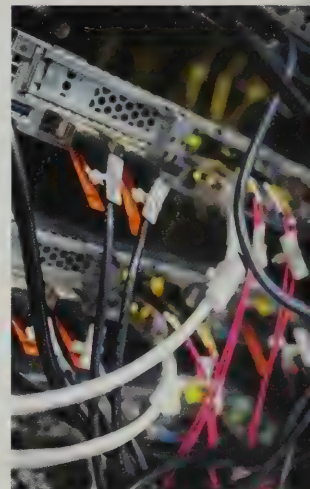

**THE RAZER KISHI** was voted the most popular new gadget at the 2020 Consumer Electronics Show. The Kishi plugged directly into Androids or iPhones and turned the device into a gamepad. The Kishi came with a "universal fit" thanks to its Gamevice belt on the back, which stretched to accommodate most smartphones. When players were done with the controller, the belt could be tucked away as the two halves clamped together.

## GIANTS STUMBLE

**SERVER OUTAGES** from major corporations controlling massive amounts of data popped up all over in 2019. In May and June, cloud services for Microsoft, Google and Cloudflare experienced multi-hour outages. In July, Slack, the popular collaboration platform, suffered disruptions, forcing workers to find alternative ways to communicate, such as actually having to talk to each other.

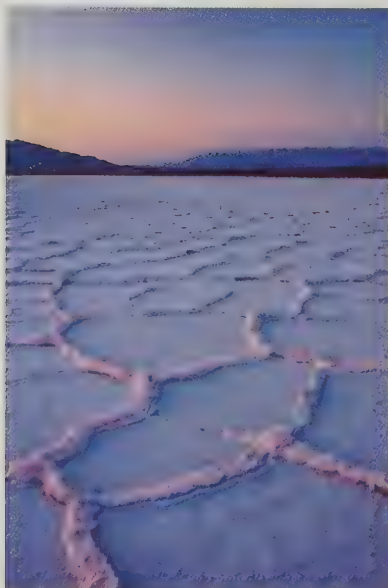

**FACEBOOK AGREED** to pay a \$5 billion penalty to settle Federal Trade Commission allegations that the social media company mishandled user privacy practices and lost control over huge amounts of user data.

The record fine was the most visible example of a growing wave of scrutiny and anticipated investigations of tech giants, such as Facebook, Amazon, Google and Apple in areas such as privacy and antitrust actions.

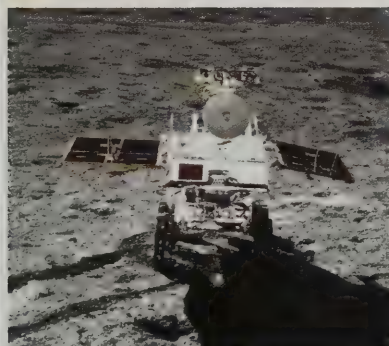

**NASA ASTRONAUTS** Christina Koch and Jessica Meir (pictured) made the first ever all-female spacewalk together. The two replaced a battery charge/discharge unit that failed to activate after new lithium-ion batteries were installed outside the International Space Station.

**EARTH AND MARS** have a common characteristic: salt lakes that have gone through wet and dry periods. An international team of scientists, including a researcher from Texas A&M University, identified the similarities between Earth and Mars' Gale Crater, an immense 95-mile-wide rocky basin that is being explored with the NASA Curiosity rover as part of the Mars Science Laboratory mission.

**PRIVATE SPACE TRAVEL** through SpaceX, an American company owned by Elon Musk, came closer to actually launching a rocket with passengers as it successfully completed a test of its capsule. SpaceX needed to still pass static fire tests, which would allow astronauts to escape in an explosion or launch problem. Boeing also had a competing spacecraft, the Starliner, which successfully tested its launch abort system in the New Mexico desert in early November.

**CHINA BECAME THE FIRST NATION** to successfully soft-land a spacecraft on the far side of the moon. The far (dark) side of the moon never faces Earth, so any mission there required a relay satellite. The mission's goal was to study the age and composition of the far side and get more information about the early solar system.

## DEEP DARK SPACE

**THE FIRST IMAGE OF A BLACK HOLE** was revealed by Chinese astronomers. The black hole, located in the heart of the Messier 87 galaxy, is 500 million trillion kilometers away and is nearly 3 million times larger than Earth. For reference, Earth's sun is only about 1.3 million times the size of Earth.

### FINAL FRONTIER

#### CREATING A NEW MILITARY SERVICE

called the U.S. Space Force, President Trump signed the National Defense Authorization Act into law in December. The first new branch of the military established since 1947, Space Force was organized within the Department of the Air Force. Gen. John "Jay" Redmond was the first commander.

## THE FORCE IS STRONG

**IN A DEAL** worth up to \$10 billion, the Department of Defense awarded the much-contested JEDI (Joint Enterprise Defense Infrastructure) cloud contract to Microsoft in October 2019. The 10-year project would transform and modernize the military's computing systems. Competitors Amazon, IBM and Oracle had also been in the running for the contract, and, in February 2020, Amazon's lawyers convinced a federal judge to put a temporary hold on the contract, citing bias. Earlier in the year Oracle had filed suit, arguing that the contract should not be awarded to a single vendor and that they believed Amazon Web Services had recruited government officials to influence the award.

**THE KANSAS CITY CHIEFS**, led by 24-year-old quarterback Patrick Mahomes, scored 21 points in the final quarter of Super Bowl LIV to secure the team's first Super Bowl win in 50 years. Mahomes, who earned MVP honors, joined Ben Roethlisberger and Tom Brady as the only quarterbacks to win the Lombardi Trophy before their 25th birthdays. Kansas City coach, Andy Reid, collected his first Super Bowl victory. Opposing quarterback, Jimmy Garoppolo, who had won two previous Super Bowls as backup quarterback for the New England Patriots, suffered his first Super Bowl loss.

## FOCUS ON FIRSTS

**IN OCTOBER**, Kenyan marathoner Eliud Kipchoge became the first human to run a marathon-distance event in under two hours. It was not an official marathon, however, as there were no other participants, and Eliud ran behind a team of other runners who formed a wind-blocking formation in front of him. At the Rio Olympics in 2016, he took the gold medal in the marathon.

**BIANCA ANDREESCU OF CANADA** and Rafael Nadal of Spain became the 2019 U.S. Open tennis champions. It was Rafael's fourth U.S. Open title and Bianca's first, as well as the first time a Canadian won a Grand Slam tournament.

**IN JANUARY 2020**, a helicopter crash near the southern California town of Calabasas killed basketball legend Kobe Bryant, along with eight other passengers, including his daughter, 13-year-old Gianna.
